YOUR PARTNER FOR
ENGINEERED RESIN COMPOUNDS

**PROFESSIONAL.
EXPERIENCED.
INNOVATIVE.**

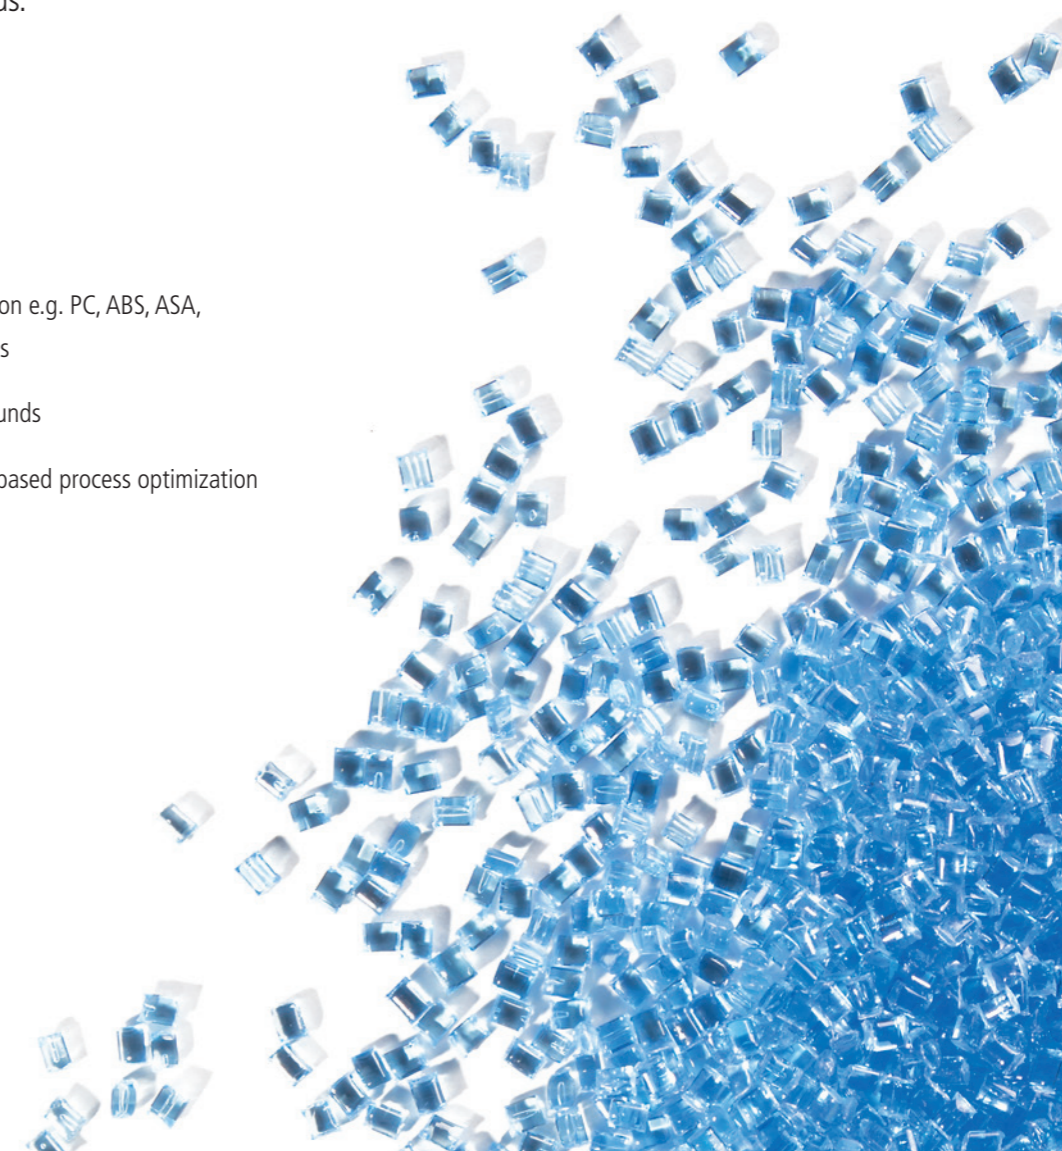

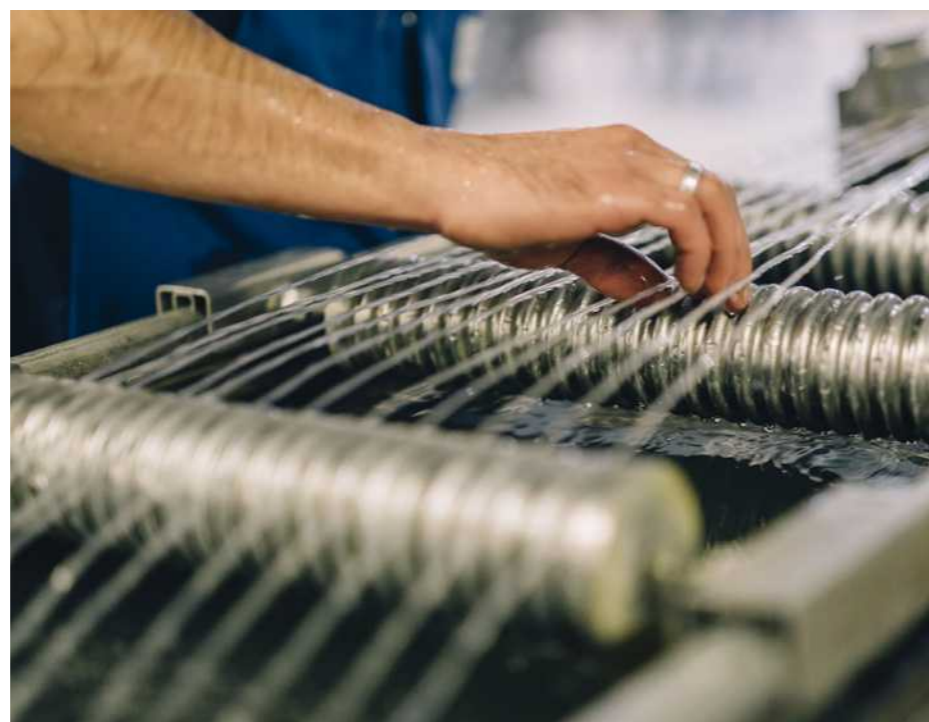

TECHNICAL EXPERIENCE IN ENGINEERED RESIN COMPOUNDS

SITRAPLAS partners with you to produce individual resin compounds for state of the art product solutions.

Located in Bünde Eastern-Westphalia, we develop and produce engineered resin compounds for almost any application. For more than 10 years, customers from the global automotive, electrical and electronics industries have benefitted from our tailor-made solutions and highest quality standards.

OUR SERVICES

- > Wide range of products based on e.g. PC, ABS, ASA, PBT, PMMA and polymer blends
- > Individual custom resin compounds
- > Customer support for product-based process optimization by our application engineers

**INFORMED.
MODERN.
FUTURE-ORIENTED.**

SPIRIT OF INNOVATION MEETS EXPERTISE

To produce advanced compounds we trust in our qualified team. We support every order with our experience. From consulting on initial development projects up to the scale-up on customers facilities, you can rely on our expertise for formulation, process engineering and colorimetry. For the perfect product. For every application.

STATE OF THE ART PILOT PLANT

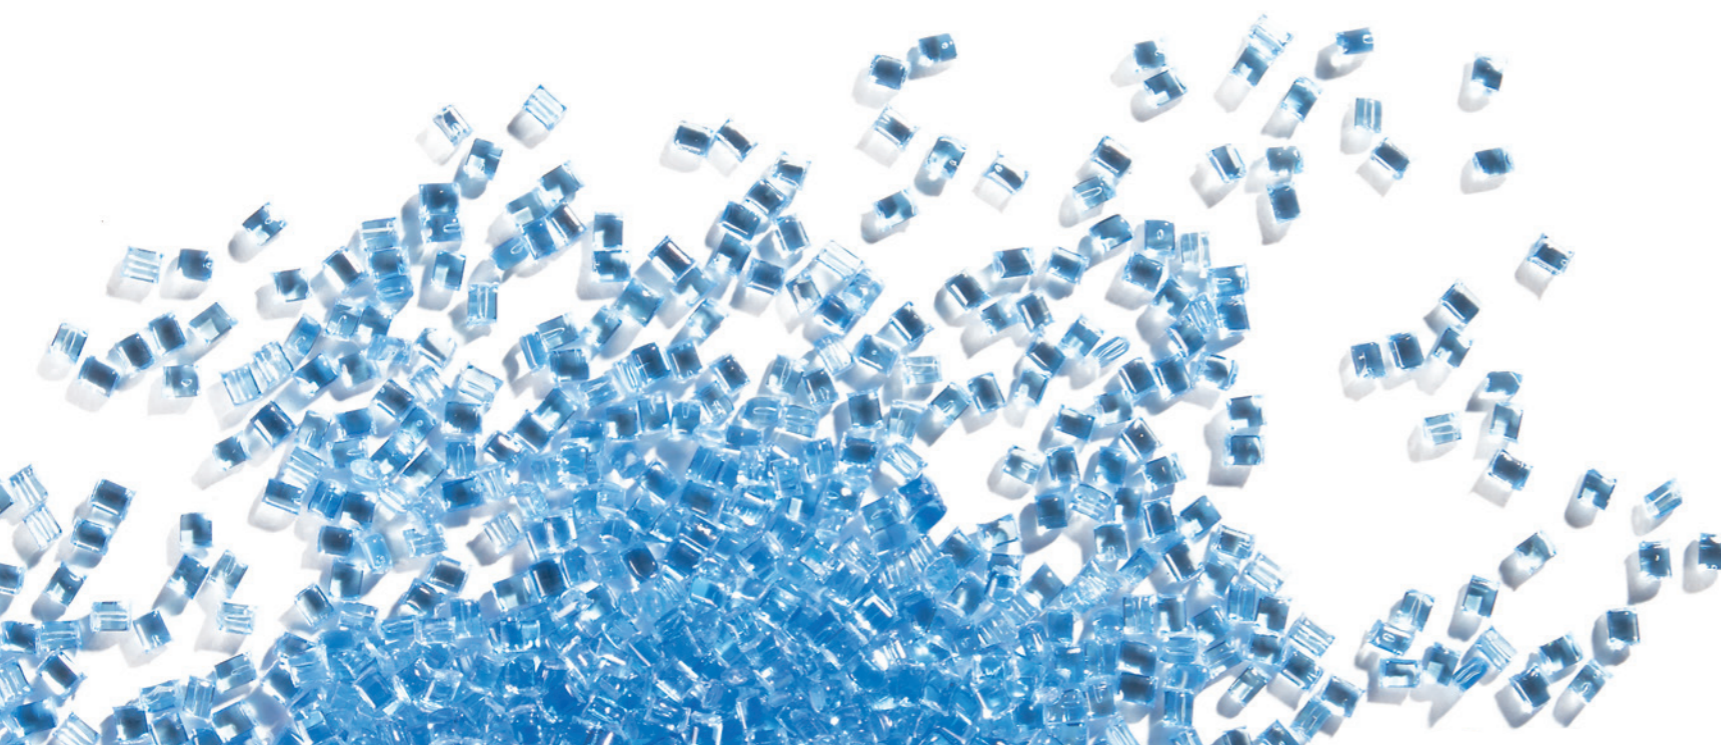

We develop every compound solution in our pilot plant on-site with comprehensive machinery equipment such as twin-screw extruders and related peripherals – capable of scale-up to our production plants. Thanks to excellent equipment and modern lab technology we can guarantee high standards.

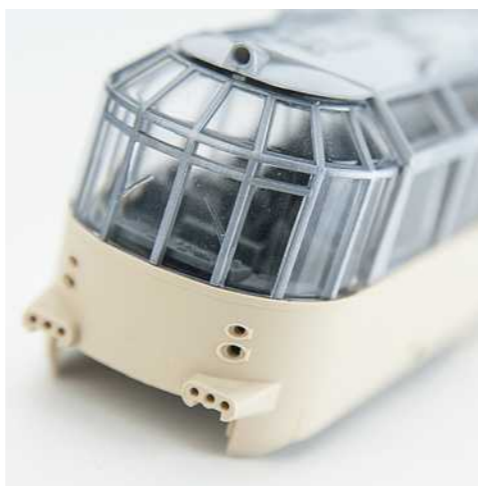

CERTIFIED QUALITY

We constantly review our product manufacturing to ensure reliable product consistency and to optimize our processing. During the manufacturing process all data and product formulations are recorded electronically. Our company is a registered DIN EN ISO 9001:2015 facility.

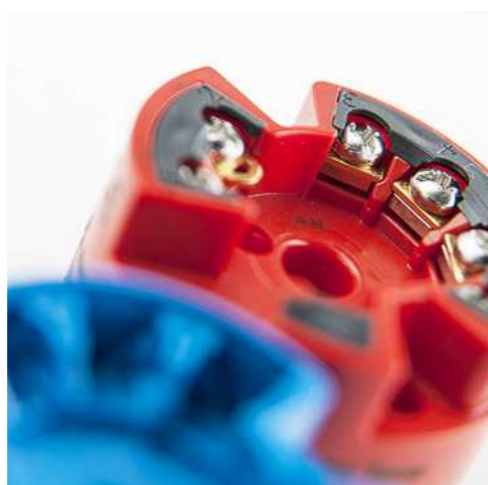

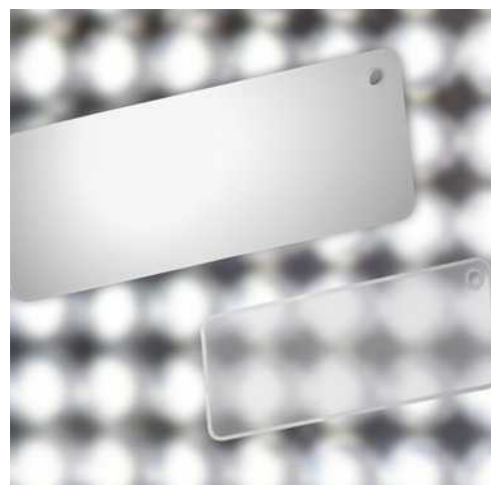

INVESTING IN THE FUTURE

We focus on sustainability. Therefore we are actively involved in research and development and participate in numerous long-term EU funded research projects. The qualification of our staff is of great importance to us. For many years we have maintained our expertise by offering apprenticeships and further education with a special focus on our junior staff.

**APPLIED.
CUSTOMIZED.
HIGH TECH.**

COMPOUND SOLUTIONS FOR SPECIFIC APPLICATIONS

We work with a variety of industries, so we combine different requirement profiles in our high-performance products. As a result we can offer technical compounds tailored for particular applications. For solutions that fit.

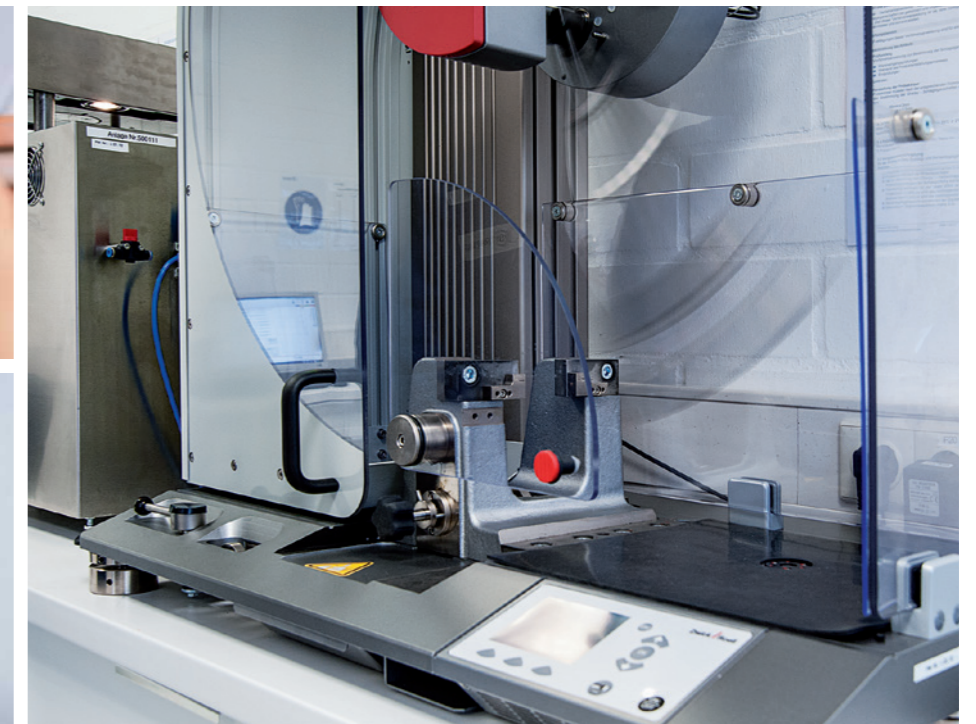

Specific properties such as mechanical issues, electric conductivity, optimized dynamic friction, non-flammability, and scratch resistance are just as possible as implementation of special optical requirements such as homogenous light diffusion. We love to face new challenges.

SOLUTIONS FOR MANY INDUSTRIES

Based on this variety of possibilities we do not sell off-the-shelf products. We believe in creating innovative technical compound solutions specially designed for custom applications. Customers benefit from our experience in areas like automotive, electric and electronic industries, lighting fixtures, appliances, toys and many other special applications.

ADDED VALUE THROUGH SERVICE

How do we assist our customers best? Through comprehensive and transparent discussion and a wide range of additional services. We support our customers from the development of a prototype up until the parts start series production. We not only assist with adapting the compound to the manufacturing process but can also make suggestions on improving process conditions.

RELIABLE PARTNER

Any manufactured product will be available on short notice for several years after discontinued production. We provide short-term delivery as well as flexible batch quantity or fast sampling.

We also offer support in our pilot plant to companies who are not familiar with the compounding industry to test formulations or processes. We are always open to new ideas.

INTERNATIONAL REPRESENTATION

Globally our customers benefit from our international and steadily expanding sales network with qualified and application-technical local assistance. For fast and professional support. SITRAPLAS quality with short-term delivery worldwide.
